"We are committed to provide quality education and to foster an intellectual atmosphere in the society"

"IITM - the hub of activities and excellence"

Iqbal Institute of Technology and Management (IITM) provides conducive atmosphere cum platform for students to discuss and deliberate educational, technological, social, legal and economic issues affecting our community at large by inviting relevant experts. The professionals of National and International standing deliver lectures and share their valuable life time experiences with our students. This valuable information from the horse's mouth is beneficial beyond limits, which can never be found in books.

These activities serve the pivotal purpose of how classroom theory correlates with practice in the field; achieved by Industrial visits, where they witness the role of men, money, machine, material, methods and markets in churning, processing or manufacturing the final product and channel it to the ultimate consumer.

The activities and programmes conducted at IITM for the last couple of months for the Management and Computer Science Students rather would-be future professionals as detailed below.
